

Standard Industrial Welded Mesh

Panel Features

Manufactured from copper washed direct drawn steel wire, conforming to BS 1052:1980

Excellent strength to weight ratio

Offered in a wide range of wire diameters from 2.50mm to 4.75mm

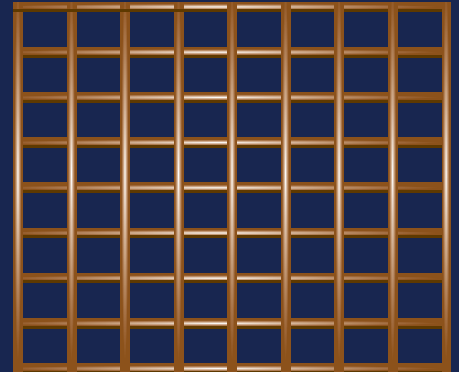

Five standard panel sizes available

Wide range of mesh configurations available

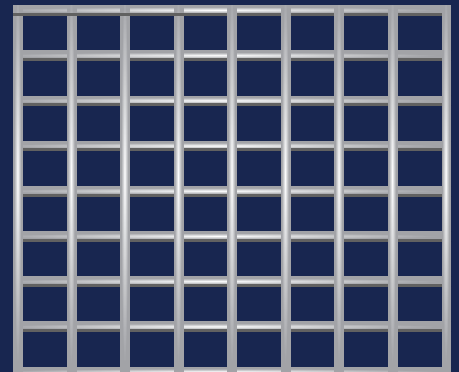

Resistance welded at every intersection to give maximum strength

Also offered as a hot dip galvanised finish BS EN ISO 1461:2009

Copper Washed Finish

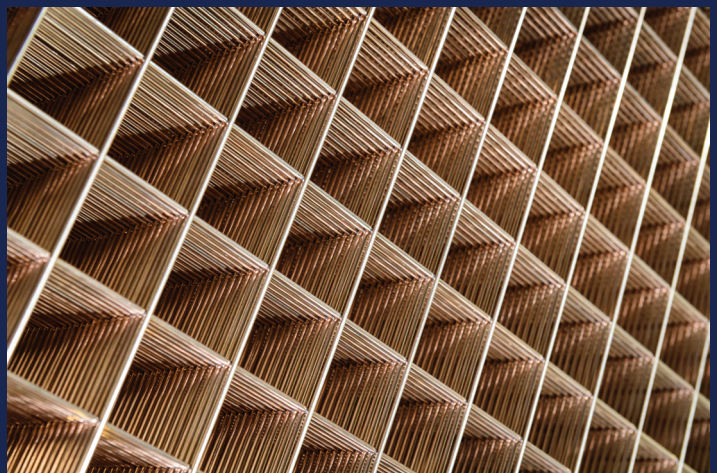

Hot Dip Galvanised Finish

Applications

- Window guards
- Machinery guards
- Cages and lockers
- Shelving / Racking
- Hayracks / Pig Flooring
- Security grills

Pallet Quantities: These are the number of panels per pallet, minimum order quantity is one pallet and typically full pallets thereafter

How to order

Siddall & Hilton Products Ltd can manufacture special panel sizes. Here is how to order. The following specifications are required:

- Width of panel
- Length of panel
- Mesh size on width
- Mesh size on length
- Wire diameter
- Wire finish

Handling, Storage & Delivery

During loading / unloading and moving to site, panels must be moved by Fork Lift truck fitted with wide carriage forks (up to 2.0m centres for the largest panels) or overhead crane with multi-point lifting cradle, to prevent distortion or damage. Additional delivery costs may be applicable dependant on location.
